

# La disciplina penale degli OGM: pene certe per pericoli incerti?

CARLO RUGA RIVA

*Penal Regulation of GMOs: Certain Sanctions Against Uncertain Perils?*

*Abstract:* The topic of GMOs lays a very delicate question to criminal law scholars: is it legitimate and/or appropriate to threaten penalties for conducts that are dangerous only hypothetically, not being actually available scientific evidences? Is it fair to put limits to individual freedom, in order to prevent risks that tomorrow may turn out to be unfounded?

*Keywords:* GMOs, Legal right, Precaution principle, Harm principle, Penal law.
