*Contemporary Bioethics among Politics and Moral: About some Recent Essays*

*Abstract:* The special issue of *Quaderni di diritto e politica ecclesiastica*, XXIII, 1, 2015, collected twelve essays (plus an introductory report), dedicated to the analysis of the relationship between bioethics, law and religion and divided into two parts concerning, respectively, the examination of comparative and theoretical profiles, and the discussion of the Italian legislation and case-law. By distinguishing three different approaches to bioethical issues (namely, a descriptive approach, a critical approach and a political one), this review offers a survey of some of the several insights that emerge from the issue.

*Keywords:* Bioethics, Religions, Powers, Moral pluralism.
