

Perché “sì alle unioni civili” è logicamente incompatibile con “no al matrimonio paritario”. Il *familiamonium* come nuovo passo della società secolarizzata

MAURIZIO MORI

Why “Yes to Civil Unions” is Logically Incompatible with “No to Gay Marriage”. The “Familiamonium” as a New Step of the Secular Society.

Abstract: Many people in Italy support the so called “civil unions” but are fiercely against “gay marriages”, because they think that gay families are unfit to educate children. This is factually false and the argument fails. But in any case the author shows that the two propositions are inconsistent and that those who accept “civil unions” have to accept also “gay marriages”.

Keywords: Family, Gay marriage, Italian bioethics.
