

Guerra e diritto: natura e limiti di un'aporia kelseniana

CARLO NITSCH

War and Law: Nature and Limits of an Aporia in Kelsen's Thought

Abstract: This article discusses a few pages of the recent book by L. Ferrajoli (*La logica del diritto. Dieci aporie nell'opera di Hans Kelsen*, 2016). The analysis focuses on the consequences that could result from the “aporia” (the second, according to the author's design), concerning the logical structure of the legal norm in the *reine Rechtslehre*.

Keywords: Hans Kelsen, International law, Just war theory, UN Charter.
