Passi avanti e passi indietro. Inseguendo l’inglese

NANDO DALLA CHIESA

Steps Forward, Steps Back. Following English

Abstract: This paper tries to synthesize the previous discussion. It underlines the general agreement on the goal of promoting the use of English in Italian academic life. At the same time the paper shows several dangers coming with the choice of teaching in English (or even “only in English”) in the Italian universities, with particular regard to the competitive strength of the Italian civilization, at the cultural, academic and economic level.

Keywords: Internationalization, University, Culture, Civilization, Competition.
