The Flat Tax as a Fiscal Detoxification Therapy. Proposals for its Introduction in Stages in a Rough Situation

Abstract: Tax abatement and simplification of the tax system may be pursued by steps via the introduction of a Flat Tax in Italy. The logic and the structure of the model presented are based on a unique tax rate of 20% on incomes over 12.000 euros and two solidarity contributes aimed to finance the health service and the services offered to immigrants. Three initial measures of the first step are considered referring to: a. VAT payers; b. commercial property rents, c. workers compensation and firms profits.

Keywords: H22 National taxation, H24 Tax, H25 Tax system.
