

Valutare l'azione e l'omissione

SERGIO FILIPPO MAGNI

Evaluating Actions and Omissions

Abstract: This article aims at clarifying the notions of actions and omissions in order to understand the 'equivalence thesis' regarding their moral evaluation. This thesis has been supported in order to reduce the gap between the evaluation of action, such as active euthanasia, and the evaluation of omission, such as passive euthanasia. This view will be defended as a part of a consequentialist approach to the problems of ethics.

Keywords: Action, Omission, Intention, Consequentialism, Responsibility
