

# **Note sulla vulnerabilità dell'identità personale digitale autorappresentativa**

MICHELE MARTONI

*Notes on the Vulnerability of the Self-representative Digital Personal Identity*

*Abstract:* The present contribution concerns the idea of personal identity in its selfrepresentative meaning. I propose, in particular, an overview of the vulnerabilities to which the growing development and maximum use of analysis, classification and profiling algorithms exposes the self-representative personal digital identity.

*Keywords:* Digital identity, Personal identity, Algorithm, Big data.
