Taking Care of the State. “Good governance” in Sabino Cassese’s Reflection

Abstract: The paper aims to analyze the concept of “good governance” as outlined by Sabino Cassese, particularly in his recent *Il Buongoverno* (2020). The investigation tries to reconstruct the author’s characterization of “good governance” focusing on the role played by politics, public administration and civic society. The essay emphasizes the strict interconnection between these three spheres and presents Cassese’s notion of “good governance” as the outcome of a collective and multi-levels practice.

Keywords: Democratic governance, Politics and administration, Citizens’ empowerment.
