*Peace and the Return of the Furies*

*Abstract:* The project of an Earth Constitution is an attempt to replicate, on the international level, the transition from the state of nature to the rule of law, delegating to a supranational authority the task of maintaining peace. The risk, however, is that the authority thus constituted abuses its power, as happened when the UN, betraying its founding mandate, authorised wars. It is therefore crucial Ferrajoli's call to ban all weapons of war, qualifying them as "illicit goods", and to allow the production and possession of only those weapons compatible with police tasks, to be reserved for public, local and global institutions.
