Intelligenza artificiale, cittadinanza digitale, controllo sociale

Commenti al volume di Silvia Salardi *Intelligenza artificiale e semantica del cambiamento*

"Un ampio lavoro educativo". Strategie per un'altra narrazione del digitale

Thomas Casadei

"An Extensive Educational Work".
Strategies for a Different Narrative of the Digital

Abstract: Silvia Salardi's book is characterised not only by the rigorous method of analysing the impact of information technologies and so-called "artificial intelligence" (AI), making effective use of the instruments of analytic-linguistic legal philosophy, but also by the results it brings to light in examining the relations between semantic issues and power: these have fruitful implications in the institutional and educational spheres.

Keywords: Artificial intelligence, Language, Narrative, Public sphere, Digital citizenship.
