Introduction

Abstract: This text offers a critical reflection on the challenges and opportunities in the healthcare sector that have emerged from the “La Sanità del Futuro” project [translation in english: “The Future of Healthcare”]. The overview presents the essays included in the Forum, which address topics such as digitalization, equity in access to care, the doctor-patient relationship dynamic, and the integration of healthcare and social assistance. Through an interdisciplinary approach, the Forum brings together perspectives from various disciplines and direct testimonies from healthcare professionals, outlining possible scenarios for the future of Italian healthcare.

Keywords: Healthcare transformation, Post-pandemic healthcare, Medical ethics and policy, Doctor-patient relationship.
