

Tra libertà, tecnologia e diritto: le sfide della responsabilità procreativa

FRANCESCA MICCOLI

Between Freedom, Technology, and Law: The Challenges of Procreative Responsibility

Abstract: This article discusses Davide Battisti's theory of procreative responsibility in the context of reproductive technologies, highlighting its implications for procreative autonomy and the potential legal consequences of such a demanding moral framework. It argues that the Greater Moral Obligation View, though formally non-coercive, may generate new forms of social pressure and justify stricter normative approaches to procreative choices, particularly affecting women's reproductive rights.

Keywords: Assisted reproductive technologies, Procreative responsibility, Reproductive rights.
