Kelsen Philosopher of Social Reality? Some Remarks on a Recent Book

Abstract: In their recent book, Paolo Di Lucia and Lorenzo Passerini Glazel call for a reevaluation of Hans Kelsen's contributions to philosophy in general, emphasizing his early and foreshadowing work in the area of social ontology. The present paper aims at testing the Authors' position, by suggesting a closer relationship between the concept of *Zurechnung* and the role of judgment in assessing responsibilities.

Keywords: Kelsen, Imputation, Responsibility, Social ontology, Judgement.
