On the Limits of Constitutional Amendment in Jorge Baquerizo

Abstract: The article offers a critical commentary on Jorge Baquerizo's book *The Limits of Constitutional Amendment*, highlighting its analytical rigor. It focuses on two main issues: the characterization of constitutional courts as lacking political representativeness and the typology of limits to constitutional amendment, assessed in light of contemporary phenomena of democratic backsliding. The essay suggests possible further developments of the book's theoretical framework through engagement with recent constitutional practice.

Keywords: Constitutional amendment, Constitutional limits, Constitutional adjudication, Democratic backsliding.
