Judicial Power and the Limits to Constitutional Amendments. Clarifications and Replies

Abstract: Stefano Catalano, Mariano Croce and María Victoria Kristan have dedicated to my book, *I limiti della revisione costituzionale. Uno studio di teoria generale*, three commentaries that address, each from a different angle, some of its central theoretical issues: the relationship between constitutional rigidity and judicial review, the physiology (or pathology) of indeterminacy in the material delimitation of the amending powers, and the relationship between democratic representation and constitutional adjudication. In these pages I will attempt to respond to each of them.

Keywords: Amendment powers, Constitutional rigidity, Material constitutionalism, Judicial review.
