Society, Person and Lebenswelten: some Remarks

Abstract: The paper focuses on the concept of “qualitative social ontology”. Starting from the analysis of some methodological aspects pertaining to the relationship among families of knowledge and law, the contribution addresses the conceptual trinomial “society-person-*Lebenswelten*” both in relation to the anthropological dimension and to the categorical level. Finally, some remarks are formulated with regard to the current and the next theoretical-legal scenarios.

Keywords: Society, Person, Lebenswelten.
